**David Attenborough**  
 Broadcaster and biologist  
 Who is he?  
 David Attenborough is a British broadcaster, biologist, natural historian and author. He is most known for writing and presenting BBC's 'Planet Earth' as well as many others. When he was younger, he always had an interest in the planet, such as collecting fossils and stones. But it was only when he was older, however, did he not only appreciate the planet, he wanted to help protect it too.  
 What challenges has he faced?  
 Despite how successful and impactful his broadcasting career now is, Attenborough actually has some major setbacks when working with the BBC. For example, the BBC had little to no interest in nature programs at the time, so they didn't put as much money or effort into his show.  
 What has he done?  
 David Attenborough has achieved many amazing things in his life. Some of his greatest ones include being the only person to have won BAFTAs for programs in black and white, colour, HD, and 4K and he has spread awareness about the natural world, so much so that he has actually helped reduce climate change significantly.
